

Adam deWinter

Election Statement for Bar Secretary

I have 40 years' experience working as an Engineer and Project Manager for major construction companies.

During the two years I have served on the GMC I have endeavoured to oversee all the building and infrastructure work undertaken at Coolhurst. The work has been completed in line with current building codes, to a satisfactory standard and within budget. There is a lot more to do and I am available to project-manage the work if elected.

In recent years the bar has been professionally and successfully run by Sarah and her team, and no longer seems to require significant intervention by the Bar Sec., a role that was more suited to a smaller members run club.
